

HU-Based Tissue Characterization (Portal Venous Phase CT)

Pathology	HU Range	Key Features	Risk
PDAC (Solid Tumor)	40-80 HU	Hypoattenuating, ratio <0.8	HIGH
Cystic Neoplasm	0-20 HU	Near water density, homogeneous	MODERATE
Acute Pancreatitis	80-120 HU	Heterogeneous, fat stranding	HIGH
Chronic Pancreatitis	>150 HU foci	Calcifications, mixed density	MODERATE
Edema	20-40 HU	Low density, homogeneous	MODERATE
Necrosis	<25 HU	Very low density + peri change	HIGH
